

Intermediate Flanges Z ...

for machine connections in accordance to DIN 55026 Form A

Intermediate Flange
type A

Intermediate Flange
type C

Intermediate Flange
type B

Intermediate Flange
type P

Description

Intermediate Flanges are used as adapters between machine connection (DIN 55026, sizes A5, A6 or A8 - see the machine connection table) and the RINGSPANN Complete Clamping Fixtures.

Possible combinations are listed in the table below. Accordingly, a given Intermediate Flange can be used for different Complete Clamping Fixtures.

Mounting

We recommend using bolts with strength class 10.9 to mount the Clamping Fixture to the Intermediate Flange and the Intermediate Flange to machine connection.

Example for ordering types A, B and C

Intermediate Flange Z, type C for centring at outside diameter Aa, for machine connections in accordance to DIN 55026 size A8, for size Aa of 120 mm:

- ZCA8 70

Example for ordering type P

Intermediate Flange Z, type P for centring in bore diameter Ba, for machine connections in accordance to DIN 55026 size A6, for size Aa of 185 mm:

- ZPA6 185

Intermediate Flange Z
Type D

Spring Force Actuator
FUSR

Increasingly demanding requirements for balancing accuracy make precise balancing procedures an absolute must.

RINGSPANN Intermediate Flanges for manual clamping and Spring Force Actuators for automated serial production conform to these high standards.

As adapters, they connect the RINGSPANN Precision Clamping Fixture with the balancing machine spindle. The spindle connection conforms to the standard set for Schenk RoTec balancing machines.

88-1

Source: Schenk RoTec vertical balancing machine in a production line

Application example

This example shows the components in use on a Schenk RoTec balancing machine. During the balancing operation, the component remains clamped in place by spring force. To release and change components, the machine-side plunger counteracts the spring force in the idle mode and releases the clamping system.

Description

Intermediate Flanges Z, Type D connect RING-SPANN Precision Clamping Fixtures to the spindles of balancing machines as adapters.

The component is clamped and released by activating the Precision Clamping Fixture manually. The Intermediate Flange is available in four sizes and is capable of large clamping ranges when supplemented by different Precision Clamping Fixtures.

Eight radial threaded bores are provided for the purpose of balancing the Intermediate Flange with Precision Clamping Fixture. The Intermediate Flange is mounted to the machine with four M 8 bolts.

Example for ordering type D

Intermediate Flange Z, type D for balancing machines (SR), with dimension Aa of 90 mm, for centering Taper Sleeve Flange Mandrel BKDF 27 on outside diameter Aa:

- ZDSR 90-BKDF 27
